Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a system re-routing signals from an affected optical path in an optical network, comprising: a first node configured to generate a message upon detecting a condition indicating that the signals from the affected optical path need to be re-routed via a protection path to the first node, configured to, upon generating the message, reserve a wavelength in the protection path, wherein the wavelength corresponds to the signals from the affected optical path so as to allow the signals from the affected optical path to be re-routed via the protection path; at least one intermediate node configured to receive and transmit the message; and a second node configured to receive the message from the intermediate node and receive the wavelength in the protection path based on the information provided in the message, upon receiving the message, generating an acknowledgment message to be transmitted to the first node via the at least one intermediate node; **and contention control logic configured to resolve priority between the message and a second message with respect to reserving the wavelength in the protection path as recited in independent claims 1, 13, 19, 29 and 34.**

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
